

# MIKAYLA TIMM

github: mtimm100 ♦ website: mtimm100.github.io

850-502-7787 ♦ mtimm100@gmail.com

## EDUCATION

---

**University of Massachusetts Amherst, 4.0 GPA**

*September 2017 - Present*

MS/Ph.D. in Computer Science, advised by Subhransu Maji

**University of West Florida, 3.99 GPA, Summa Cum Laude**

*2014-2017*

BS in Computer Science, Minor in Mathematics

## RESEARCH EXPERIENCE

---

**University of Massachusetts Amherst**

September 2017 - Present

*Graduate Research Assistant - Computer Vision Research Laboratory*

- Researching computer vision techniques for fine-grained visual categorization of animals at the species level and individual level. (Presented at two CVPR 2018 Workshops)
- Investigating techniques for generating open-ended descriptions of textures in images using deep representations.

**MIT Lincoln Laboratory**

June 2017 - August 2017

*NLP Summer Research Intern - Group 104 (Intelligence and Decision Technologies)*

- Researched natural language processing techniques for generating word embeddings in the multilingual context to enable performing NLP tasks on inherently multilingual data, such as tweets.
- Developed a system for processing multilingual text corpora, training word embeddings, visualizing the resulting high dimensional vectors in a 2D space, and performing intrinsic evaluations on the embeddings, such as analogies and nearest neighbors.

**University of West Florida**

September 2016 - May 2017

*Wearable Device Security Research Assistant*

- Utilized supervised learning algorithms to classify biometric data obtained from simulated wearable device cyber attacks.
- Helped collect and label wearable device data, performed simulated device synchronization attacks over Bluetooth, and built models to understand what data was obtained from the synchronization packets.

**University of West Florida**

May 2016 - August 2016

*Summer Undergraduate Research Scholar*

- Researched supervised machine learning techniques for predicting outcomes of animals in shelters.
- Performed data analytics on animal shelter data to observe relationships between animal attributes and outcomes.

**University of Massachusetts Amherst**

May 2015 - August 2015

*REU Student Researcher - Computer Vision Research Laboratory*

- Researched computer vision algorithms for identifying individual jaguars in images to assist ecologists with their conservation efforts.
- Worked with the UMass Department of Environmental Conservation to collect and label images.
- Implemented a system for performing automatic jaguar identification invariant to changes in scale, rotation, translation, illumination, and partial occlusion.

## PROGRAMMING LANGUAGES AND PROJECTS

---

<b>Languages</b>	Python, MATLAB, C, Java, C#, R, SAS, SQL, LISP, Prolog
<b>Projects</b>	Image Captioning with LSTM Networks Plagiarism detection program for analyzing similarity between files Programmed iRobot Create to give university tours using sensors and speakers Shell program for parsing commands and running distributed computing applications Queue simulation program for analyzing throughput for service channels Genetic algorithm approach to solving the Traveling Salesman Problem LL(1) recursive descent parser that generates assembly code for arithmetic operations Library of various numerical approximation algorithms Backend for Pokemon Go-style mobile app for introducing students to UWF campus

## HONORS AND ACHIEVEMENTS

---

CVPR Women in Computer Vision Workshop Poster Presenter	<i>Summer 2018</i>
CVPR Women in Computer Vision Travel Grant Recipient	<i>Summer 2018</i>
CVPR Workshop on Fine-Grained Visual Categorization Poster Presenter	<i>Summer 2018</i>
CRA-W Grad Cohort Workshop Participant	<i>Spring 2018</i>
UMass Amherst CICS Edward Riseman and Allen Hanson Scholarship	<i>Fall 2017</i>
Grace Hopper Celebration of Women in Computing (GHC) Scholar	<i>Fall 2016</i>
UWF Computer Science Nick Johnson Academic Scholarship	<i>Fall 2016</i>
UWF IT Performance Scholarship	<i>Fall 2016</i>
UWF Outstanding Undergraduate Student in Computer Science Award	<i>Spring 2016</i>
UWF Office of Undergraduate Research Best Student Project in Computer Science	<i>Spring 2016</i>
1st Place in Division 2 ACM International Collegiate Programming Contest, UWF site	<i>Fall 2015</i>
UWF Nautilus Scholarship	<i>Fall 2014-Spring 2017</i>
Florida Bright Futures Academic Scholars Award	<i>Fall 2014-Spring 2017</i>

## PUBLICATIONS AND PRESENTATIONS

---

- **Timm, M., Maji, S., Fuller, T. (2018). Large-Scale Ecological Analyses of Animals in the Wild using Computer Vision.** Poster presentation in *CVPR Women in Computer Vision Workshop*, 2018.
